

The following Listing of the Claims contains all of the pending claims (1-35) as originally filed. None are amended in this paper.

1. (Original): A system for obtaining information about the work activities of an employee, comprising:

a server for providing a site through which the employee creates a profile of the work activities of the employee; and

a computer capable of accessing the site over a network, the employee using the computer to create the profile of the work activities of the employee and transmit the information about the work activities of the employee to the server;

wherein the server calculates a value for the profile of the work activities of the employee.

2. (Original): The system according to claim 1 wherein the server is capable of performing an analysis of the work activities of the employee based on the profile of the work activities of the employee and the calculated value.

3. (Original): The system according to claim 2 wherein the server is capable of generating a report based on the analysis.

4. (Original): The system according to claim 1 wherein the network is a network known as the Internet.

5. (Original): The system according to claim 1 further comprising a first database including work activity values for work activities of the employee in the profile.

6. (Original): The system according to claim 1 further comprising a second database including a directory of work activities used to create the profile.

7. (Original): The system according to claim 1 wherein the profile contains a plurality of groups of work activities.

8. (Original): The system according to claim 7 wherein the employee assigns a percentage of the employee's time to each group of work activities in the profile.

9. (Original): The system according to claim 8 wherein a work activities group value is calculated for each group of work activities.

10. (Original): The system according to claim 9 wherein the work activities group values for the groups of work activities are weighted to calculate the value for the profile.

11. (Original): A system for obtaining information about the work activities of a plurality of employees, comprising:

a server for providing a site through which each of the plurality of employees creates a profile of the work activities of the employee; and

at least one computer capable of accessing the site over a network, each of the plurality of employees using the computer to create the profile of the work activities of the employee and transmit information about the work activities of the employee to the server;

wherein the server performs an analysis of the work activities of the plurality of employees based on the profiles of the work activities of the employees.

12. (Original): A method of obtaining information about the work activities of an employee, comprising:

providing a site accessible to the employee over a network;

creating a profile of the work activities of the employee at the site; and

calculating a value for the profile of the work activities of the employee.

13. (Original): The method of claim 12 further comprising generating a report based on the work activities of the employee in the profile and the calculated value for the profile.

14. (Original): The method of claim 12 further comprising adding work activities of the employee to the profile.

15. (Original): The method of claim 12 further comprising deleting work activities of the employee from the profile.

16. (Original): The method of claim 12 further comprising providing a template for the employee to create the profile.

17. (Original): The method of claim 12 further comprising converting the value for the profile to a local geographic equivalent value.

18. (Original): The method of claim 12 further comprising assessing a capability of the employee with respect to the work activities in the profile.

19. (Original): The method of claim 12 further comprising assigning a percentage of the employee's time to the work activities in the profile.

20. (Original): The method of claim 12 further comprising weighting the working activities of the employee in the profile to calculate the value for the profile.

21. (Original): A method of obtaining information about the work activities of an employee, comprising:

- providing a site accessible to the employee over a network;
- creating a profile of the work activities of the employee at the site; and
- analyzing the profile of the work activities of the employee.

22. (Original): The method of claim 21 further comprising generating a report based on the work activities of the employee in the profile.

23. (Original): The method of claim 21 further comprising adding work activities of the employee to the profile.

24. (Original): The method of claim 21 further comprising deleting work activities of the employee from the profile.

25. (Original): The method of claim 21 further comprising providing a template for the employee to create the profile.

26. (Original): The method of claim 21 further comprising assessing a capability of the employee with respect to the work activities in the profile.

27. (Original): The method of claim 21 further comprising assigning a percentage of the employee's time to the work activities in the profile.

28. (Original): An apparatus comprising a computer-readable medium that stores instructions for implementing an application to obtain information about the work activities of an employee, the instructions for causing a computer to:

- provide a site accessible to the employee over a network;
- create a profile of the work activities of the employee at the site; and

calculate a value for the profile of the work activities of the employee.

29. (Original): The apparatus of claim 28, further comprising instructions for causing a computer to

generate a report based on the work activities of the employee in the profile and the calculated value for the profile.

30. (Original): A system for implementing an application to obtain information about the work activities of an employee, comprising:

a memory which stores computer instructions; and

a processor that executes the computer instructions to:

provide a site accessible to the employee over a network;

create a profile of the work activities of the employee at the site; and

calculate a value for the profile of the work activities of the employee.

31. (Original): The system of claim 30, further comprising instructions to generate a report based on the work activities of the employee in the profile and the calculated value for the profile.

32. (Original): An apparatus comprising a computer-readable medium that stores instructions for implementing an application to obtain information about the work activities of an employee, the instructions for causing a computer to:

provide a site accessible to the employee over a network;

create a profile of the work activities of the employee at the site; and

analyze the profile of the work activities of the employee.

33. (Original): The apparatus of claim 32, further comprising instructions for causing a computer to

generate a report based on the work activities of the employee in the profile.

34. (Original): A system for implementing an application to obtain information about the work activities of an employee, comprising:

a memory which stores computer instructions; and

a processor that executes the computer instructions to:

provide a site accessible to the employee over a network;

create a profile of the work activities of the employee at the site; and

analyze the profile of the work activities of the employee.

35. (Original): The system of claim 34, further comprising instructions to generate a report based on the work activities of the employee in the profile.
